MEMORANDUM OF AGREEMENT_04082013(April 2013).docx

Lisa,

Kevin made some tweaks to the MOA. Details below. I can see the program reports being a problem, but it makes sense since we have no Class VI database and I doubt we will have one even a year from now.

Section II Policies and Agreements

Page 2 Subsection C. Conformance with laws and regulations - I consolidated "current federal statutes and regulations" and "state and federal law" into "state and federal laws and regulations"

Section: VI EPA oversight

Page 6 Subsection C. program reports - I added this language in an attempt to explain the way CO2 RBDMS will work and to remedy the issue EPA created with 40 CFR 146.91 (e).

Page 7 Subsection I. Inspection and Surveillance by EPA - We were not comfortable with the way it originally read. I made changes in accordance to Section 1445 (b).

Other changes made were minor. For example I changed "state" to "commission" to read more clear.

Craig,

We have made some changes to the MOA. Please review this document again and let me know if you find any issues.

Thanks

Kevin C. Connors
